SENSEI™ RXP PUMP PERFORMANCE AND PUMP + TANKLESS PERFORMANCE CURVE

Recirculation Pump Control

- Smart-Circ.™ “learns” users’ hot water patterns to activate recirculation.
- Manual schedule selection is available with Accessory controllers (MC-195T or Wi-Fi module).

Internal Multi-Speed DC Pump

Integrated pump allows for recirculation through a dedicated return line or crossover with thermal bypass valve.

Maximum Recirculation Pipe Lengths

- 400 equivalent feet for 3/4 in. pipe diameter
- 100 equivalent feet for 1/2 in. pipe diameter

Take equivalent elbow lengths into consideration when calculating pipe length.

For dedicated return lines: Total length includes both hot water supply and dedicated return lines.

Cross-over mode: Total length includes both hot water supply and cold water piping length from the tankless water heater to the thermal bypass valve. Cross-over mode requires the use of a thermal bypass valve (included).
